U. S. DEPARTMENT OF AGRICULTURE,

BUREAU OF ANIMAL INDUSTRY.

A. D. MELVIN, CHIEF OF BUREAU.

SERVICE AND REGULATORY ANNOUNCEMENTS.

FEBRUARY, 1915.

[This publication is issued monthly for the dissemination of information, instructions, rulings, etc., concerning the work of the Bureau of Animal Industry. Free distribution is limited to persons in the service of the bureau, establishments at which the Federal meat inspection is conducted, public officers whose duties make it desirable for them to have such information, and journals especially concerned. Others desiring copies may obtain them from the Superintendent of Documents, Government Printing Office, Washington, D. C., at 5 cents each, or 50 cents a year. A supply will be sent to each official in charge of a station or branch of the bureau service, who should promptly distribute copies to members of his force. A file should be kept at each station for reference.]

NOTICES REGARDING MEAT INSPECTION.**SUPPOSED ACTINOMYCOSIS IN HOGS.**

Lesions of all hog carcasses considered to be affected with actinomycosis should be forwarded to the Pathological Division of this bureau, Washington, D. C., for further examination. The Form M4 report submitted with each specimen should indicate the number of the meat-inspection retained tag which was used to mark the carcass.

SAUSAGE IN ARTIFICIAL CASINGS.

Pending further notice, sausage stuffed in paper or other artificial casings will not be considered as food in package form within the meaning of regulations promulgated under the net weight and volume amendment. Accordingly, it will not be necessary, for the present, that such casings be marked with the statement of the net weight.

In this connection it should be understood that approval of artificial casings must in each instance be secured from the Washington office of the bureau before their use is permitted.

DISINFECTION OF HIDES FROM DISEASED CARCASSES.

Referring to paragraph 3, section 8, regulation 10, B. A. I. Order 211, skins and hides of animals condemned for tuberculosis or any disease communicable to man or other animal may be removed from the official establishment for tanning or other industrial use, except as provided in section 2 of regulation 11, after disinfection by immersion for not less than four hours in a mixture composed of one part of bichlorid of mercury to 1,000 parts of salt solution. The salt solution may be of any strength from not less than 15 per cent to saturation.

PÂTÉ DE FOIE GRAS, ETC.

In view of recent information to the effect that "pâté de foie gras" and similar products are not composed exclusively of goose liver but contain pork liver or other meat food products, inspectors of this bureau are directed to inspect and handle foreign products of this character, and to refer to the Bureau of Chemistry such products which, upon analysis, do not show the presence of a meat food product.

NAMES REMOVED FROM LIST OF FOREIGN MEAT-INSPECTION OFFICIALS.

The following names have been removed from the list of officials authorized to sign and issue meat-inspection certificates for meat and products exported to the United States:

CANADA.

J. O. Guertin, Ingersoll, Ontario.
W. A. Morrin, Hamilton, Ontario.
J. M. Stuart, Toronto, Ontario.

INSPECTION AND TESTING OF ANIMALS FOR CANADA.

The following name has been added to the list of practicing veterinarians registered by the bureau and authorized to inspect and test with mallein horses, mules, and asses intended for export to Canada:

Dr. R. W. Falk, Canton, S. Dak.

REPORTING TO STATE OFFICIALS DETECTION OF DISEASE EN ROUTE.

The attention of bureau employees is directed to paragraphs 37 of "Instructions Concerning the Preparation and Application of Dips and Reporting Inspections and Dippings of Sheep and Cattle for Scabies," which reads as follows:

When a shipment of cattle or sheep is found, whether en route or at destination, to be affected with scabies the inspector at the point where the disease is detected should immediately forward notices of the condition of the animals to the proper State official and to the inspector in charge of the district in which the shipment originated. Such notices should be prepared on I. D. Form 24B and mailed as early as possible, in order to facilitate the prompt disinfection of the yards and pens through which the animals were handled. In such cases the report, I. D. Form 24B, sent to the Washington office, should bear a notation indicating that notices were given as above directed. Care should be taken by those having the matter in charge to see that the above instructions are always complied with.

SUBSTANCE PERMITTED FOR OFFICIAL DIPPING.

The use of the following substance is permitted by the department in the official dipping of sheep for scabies.

"*Black Leaf 40*," a nicotin dip, manufactured by the Kentucky Tobacco Product Co., Louisville, Ky. This dip is to be used at a strength of not less than five one-hundredths of 1 per cent of nicotin, as ascertained by "field test outfit N-3," with the addition of 2 per cent of flowers of sulphur or sulphur flour to prevent reinfection.

EMPLOYMENT OF FARM LABOR.

The attention of all officers of the Bureau of Animal Industry who come in contact with individual farmers and who may be able to report on local farm labor conditions is called to the following circular letter issued by the Department of Labor under date of January 8, 1915, and to the appended note from the Secretary of Agriculture:

To all officers of the Department of Agriculture:

The Post Office Department and the Department of Agriculture are cooperating with the Department of Labor in aid of the plan for the employment and distribution of laborers in the United States; the former through its postmasters, officers in charge of branch post offices, and rural mail carriers; and the latter through its field and other services throughout the United States, among which you are numbered.

The purpose of this plan is to supply labor where required in every section of the Republic, and your assistance is respectfully solicited. Communications from you concerning the necessity for workers in the locality in which you reside and the vicinity thereof are especially desired. The Department of Labor will appreciate your efforts in notifying farmers and other employers of labor in your neighborhood of the inauguration by said department, with the cooperation of the departments above mentioned, of a plan to furnish farm or other labor at all seasons of the year.

In order to enable you to advise both prospective employers and employees desiring to avail themselves of the opportunities presented by said plan, the following explanation of the methods adopted may be of service: Blanks for use of employers desiring help and for persons seeking employment may be had on request from the postmaster, or officer in charge of any branch post office, or rural mail carrier. All application blanks when filled out and signed should be folded and returned to the postmaster or other officers mentioned, whereupon they will be forwarded to the proper officer of the Department of Labor, where they will receive special and prompt attention. When thus returned, no postage will be required; otherwise the usual postage will be necessary.

Respectfully,

A. CAMINETTI,
Commissioner General of Immigration.

Approved:

W. B. WILSON,
Secretary of Labor.

To all officers of the Department of Agriculture:

You are hereby notified that the Department of Agriculture is cooperating with the Department of Labor in aid of its plan for the employment and distribution of laborers in the United States.

Therefore you are hereby authorized and directed to comply with the foregoing request approved by the Secretary of Labor.

Future general instructions, which when issued you are requested to follow, will be printed in the Weekly News Letter.

D. F. HOUSTON,
Secretary of Agriculture.

LEAVE FOR FIELD EMPLOYEES.

With the Secretary's permission, the bureau will continue the granting of leave to employees in the field as heretofore in accordance with the rules on pages 29 to 34 of Service Announcements of April 15, 1912. Paragraphs 58 and 59 of the Administrative Regulations of this department, effective July 1, 1914, are modified accordingly.

PUBLICATIONS IN FEBRUARY.

[The Bureau keeps no mailing list for sending publications to individual employees, but publications are sent in bulk to inspectors in charge for distribution to members of their forces. The number of copies varies with the subject or nature of the publication and the number and class of employees. For example in the case of a publication on a veterinary subject, sufficient copies are sent for the veterinarians. Inspectors in charge will use their judgment and distribute publications to best advantage. Additional copies will be furnished on request so far as possible.]
